Music consumption is up, but music sales are down. The largest AM/FM radio in the world is Heartradio. In recent years, audio and video-on-demand transmission services have set high records for flows. Playing a music video on YouTube also counts as a song. It's a list of the 100 most popular songs on the US chart, it also tracks whether a song is higher or lower on the charts each week, its maximum position and its total weeks on the chart. (The only other album that has achieved this feat is Michael Jackson's Mal.) On the possibility that this seems like a coincidence, it is worth noting that Perry recently became the most popular person on Twitter, with more than 47 million followers. For example, if an album, on January 27th, is the total number of listeners, it will be from the follow-up week of January 12th. Sales of VALUES AND TRANSFUMPTHILE have been decreasing in recent years, the use of transmission services is increasing. Nielsen tracks radio stations across the country and measures the songs that are playing. Radio: Once a song becomes popular enough to be picked up by radio stations, it can get a lot of track and win a spot on the Hot Billboard 100. You can watch the music video and listen to almost all the songs directly on the billboard's website.
